

Competition Corner: Gibbs-Energy Limits

g11_u02_w08

Original fictional paper models only. No chemical activity, process operation, or material handling is requested.

1. Use -12.0 kJ, -0.030 kJ/K, 310 K.
2. Find T for $+18$ kJ and $+0.060$ kJ/K.
3. Why does negative ΔG not predict speed/completion?
