

Competition Corner: Validation Review

g12_u02_w08

Original fictional evidence-review challenges. No procedure, instrument operation, sample analysis, or real-substance claim is implied.

Challenge 21. Design a five-part review template for a fictional candidate-evidence file. Include claim, supporting cards, conflicts, uncertainty, and one next supplied check. Give two examples of prohibited overclaims.

Challenge 22. A reviewer favors Candidate A because it matches two cards, but Candidate B also matches both and one label remains unexplained. Write a fair review that identifies confirmation bias and gives a rule for revising the conclusion.
