

Competition Corner: Interaction-Model Audit

g12_u03_w09

Original fictional molecular-environment challenges. No biological experiment, health claim, or procedure is implied.

Challenge 21. A fictional card contains polar, charged, and nonpolar regions in a water-labeled environment. Create an interaction table with possible stated model relation, missing context, and prohibited overclaim for each region.

Challenge 22. Write a review rubric for a fictional buffer card that includes conjugate components, capacity, conditions, uncertainty, and a boundary against medical or health conclusions.
