

Competition Corner: Pathway Boundary Audit

g12_u03_w11

Original fictional systems challenge. No biological procedure, health claim, or real-system prediction is implied.

Challenge 21. Create an audit table for Fictional Pathway P: boundary, matter inputs, matter outputs, energy-transfer labels, missing information, and prohibited overclaims.

Challenge 22. A pathway card adds a feedback arrow but gives no measurements. Write a careful systems interpretation that separates the diagram convention, a possible model role, missing evidence, and a next supplied card.
