

Competition Corner: Polymer Evidence Audit

g12_u04_w13

Original fictional materials challenge. No fabrication, processing, disposal instruction, or product recommendation is implied.

Challenge 21. Build a table for two fictional polymer cards: repeat-unit features, supplied property evidence, lifecycle boundary, uncertainty, and prohibited overclaim.

Challenge 22. Write a criterion-based materials comparison that preserves tradeoffs and refuses a universal sustainability or product-use conclusion.
