

Competition Corner: Three-Model Reconciliation

g12_u08_w30

Challenge 21. Construct a fictional case in which a lower-energy final-state card, a high-barrier slow-rate card, and an equal-opposing-rate card are all compatible. Identify which conclusion would be an overreach from each card.

Challenge 22. Audit the sentence “The preferred process happens quickly and goes to completion.” Replace it with the smallest set of claims that cards E, K, and Q could independently support.
